3 June 1970

MEMORANDUM FOR THE RECORD

SUBJECT: Secretary Laird's Presentation to the NATO  
Nuclear Planning Group (8-9 June 1970)

1. [ ] and I met with [ ]

[ ] to discuss the  
arrangements and materials for Laird's briefing.

2. We read the dozen-page briefing and examined the  
twelve graphics to be used. The graphics include nine [ ]  
photographs of SS-9 and SS-11 silos, construction facilities  
for the Y-class missile-launching submarine, and the swing-  
wing bomber; there are also three maps of the USSR showing  
the deployment of ICBMs and Hen House radars. We made a  
few relatively minor substantive suggestions for changing the  
text and recommended increased emphasis on the security  
warning which is included in the text. All our suggestions were  
gratefully received and will be recommended to the Secretary.

4. [ ] described the security arrangements for handling the material and for sweeping the rooms. He stated that no notes would be permitted, that a warning against cabling the substance of the meeting would be announced, and that no record of the briefing would be made. In sum, the security arrangements appear to be proper.

X1

5. [ ] also said that the briefing would be shown to Under Secretary Richardson on 3 June and probably to Mr. Kissinger at a later date.

6. Later, after discussing the matter with the Director, I called [ ] to say that the Director concurred in the arrangements but with some reluctance about the high resolution of the photography being used.
